

Denver R.

May 4, 1964

Mr. Allen H. Tibbals
Attorney at Law
319 East Second South
Salt Lake City, Utah

Dear Mr. Tibbals:

We contacted Mr. Tom Strong, Beaver River Commissioner, and recorded the following measurements of the inflow to Rocky Ford Reservoir and the flow of the Beaver River:

Table of Beaver River System Measurements
April 29 - May 1, 1964

Date	Beaver River cfs.	Rocky Ford Reservoir Inflow cfs.
4-29	20.5	1.3
4-30	25.2	8.11
4-31	21.1	5.35
5-1	15.7	1.37
5-2	15.0	4.34
5-3	16.0	6.35
5-4	16.41	2.30
5-5	16.00	6.35
5-6	12.00	1.49
5-7	12.00	3.32
5-8	23.34	12.80
Total	193.36	57.63

It is noted that Rocky Ford is entitled to approximately 22% of the flow from the Barton Ditch to the Reservoir. The measurements show a total delivery to Rocky Ford Reservoir from April 29 to May 1 of approximately 57.63 of the flow and with the exception of minor diversions all the flow from April 1 to April 24 was allowed to pass into the reservoir. From April 24 to April 25, no checks were made and the record is not available.

We trust this will answer your questions and clarify the delivery to the reservoir during April of this year.

We have instructed Mr. Strong to keep a close check of this water to ensure delivery according to the granted rights.

Yours very truly,

Donovan C. Bowditch

Donald C. Bowditch
BEAVER RIVER COMMISSIONER

✓ Computation of all diversions from Barton Ditch to Rocky Ford Reservoir.

✓ Measurements are taken at the Adairville Gate and any needed adjustments of the headgates and other measurements are taken.

cc: Mr. Stan Knobright and Mr. Israel Strong
